Notes from you to us

Did a shop refer you to us? which one:

Please draw all known damaged areas (we live for details)

Certainly this diagram won't match your wing exactly so simply indicate regions. Also help us by looking inside your foil for hidden damage to ribs.

- ☐ Yes, some of the bridles are damaged. Please repair.
- ☐ I sent this with its bag. (not always needed but it is up to you)
- ☒ The wing was not packed using styrofoam peanuts because they are not needed.

What this ticket does: This ticket is to help us get your wing completely healed. The more you can tell us about the damage, the better. It is also our way to contact you and will hang around in our studio faithfully with your wing until we are done with the repair. Then it helps create your invoice and finally gets dropped in a box to go down in history as the weight of other tickets pile on top of it. You can give us special instructions draw funny pictures and write funny stuff if you like. Also please know that we also do our best to check your wing completely regardless of what you indicate on this ticket.
